### SUMMARY

I'm a Front-End developer who loves building websites and learning new things. For the past year, I've worked on real projects using HTML, JavaScript, React, Node.js, and MongoDB. I may not have job experience in a company yet, but I've built full-stack apps on my own that work just like real-world websites. I enjoy solving problems and making user-friendly designs. I'm excited to join a team where I can grow and use my skills to create great things.

### SKILLS

- HTML5
- CSS3
- Javascript
- React
- Tailwind CSS
- Node Js
- Express
- MongoDB
- Node JS
- JWT
- Webflow
- Github

### PROJECTS

#### Restaurant Website

[Live Link](#)

[Server Link](#)

Bistro Boss is a full-stack restaurant web app built with React.js, Firebase, and Tailwind CSS that lets customers browse menus, place orders, and pay securely. It includes user authentication, a responsive UI, and an admin dashboard with role-based access control.

#### CattleX

[Live Link](#)

[Server Link](#)

CattleX is a full-stack cattle marketplace built with React.js and Node.js that lets users browse, buy, and sell cattle with real-time market price tracking. It features role-based access for admins, managers, and customers, secure authentication, and a responsive UI with live market insights and order management.

#### Cam Fulfillment (WEBFLOW)

[Live Link](#)

CAM Fulfillment is a German 3PL logistics platform built with Webflow that provides same-day order fulfillment, warehousing, and returns management for D2C e-commerce brands. It features real-time inventory tracking via a live dashboard, 99.9% pick accuracy, 7-days-a-week shipping, and up to 40% lower logistics costs with Amazon FBM Prime support.

### EDUCATION

#### Bachelor of Science (BSc)

2024 -2027

World University of Bangladesh

- Computer Science and Engineering
- CGPA: 3.27

### COURSE AND CERTIFICATION

#### Programming Hero

July 2024 – Decmber 2025

- Developed an expert learner mindset to independently research, adapt to, and master new backend technologies and tools.
- Engineered robust backend architectures, focusing on secure REST APIs, authentication, and scalable database management.
- Applied advanced problem-solving and debugging techniques to write clean, optimized, and production-ready code.
